BUG REPORT

Name: Nikita Mankani
SRN: PES1UG24CS300
Section: E
Problem Statement: #54 - Local Sports Tournament & Bracket Manager

SCREENSHOT:

This board holds 5 bugs I logged against the Local Sports Tournament & Bracket Manager, based on the kind of issues that would realistically turn up while testing the FRs from Lab 1. Two are High priority: a crash when two teams share the same rank during bracket generation (breaks FR-001), and a completed match's score getting silently overwritten if resubmitted (breaks FR-002). Two are Medium: stale goal-difference numbers after a tiebreaker resolves (FR-003/FR-004), and the score entry form being reachable by a non-director even though the backend correctly rejects the submission (a partial gap against NFR-002). One is Low: the published standings page not showing a last-updated timestamp (FR-005). I moved the ranking-crash bug into In Progress to show it's actively being looked at; the rest are still sitting in To Do.
